Dear Ms. Smith:

I would like to apply for the Database Administrator position that is available. I heard about the position from Sarah Milligan who currently works at the Kentucky Historical Society and is a close personal friend.

The position looks to be a good fit for my set of skills. I have over 5 years of experience managing databases and building database backed applications. I'm currently employed at Griffin Technology as the IT Manager. My duties there include managing an Oracle 10G database that supports the companies main accounting and finance application, JD Edwards. I also manage critical projects and utilize a team of 5 other IT professionals to schedule and complete those projects. During my time there I've managed and deployed many different databases on multiple operating systems. On my off time I run a small Web Development company that develops content management systems for various clients including small to large businesses and individuals.

I would like to request an interview at your earliest convenience. I'm available by phone at 615-482-2167. My email address is fadeddata@gmail.com. As I am only a few hours away I can also be available for an in person interview. Thank you for your time and consideration.

Sincerely yours,

Dustin Withers
